

In a stunning turn, a virus engineered by an errant Sith Lord has spread across the galaxy, stealing the ability to touch the Force from all who succumb. For reasons unknown, only those who carry the blood of Anakin Skywalker seem immune.

As Marasiah Fel struggles to hold the Galactic Federation together, Darth Nihil's One Sith press on with their plans for conquest, launching military attacks on its edges while sowing discord in its core. Meanwhile Ania Solo has rediscovered the mother she barely remembers and been enlisted in the woman's campaign to overthrow the reigning Mandalore.

The best hope may be Cade Skywalker, who leads a long-shot, ragtag mission to find a Yuuzhan Vong rumored to have recovered the Force. Unfortunately for him, the Sith are also hot on the same trail...
